**Subject:** Updated Information Related to the Pharma Solutions Business Transition from IFF to Roquette

Dear Valued Customer,

As previously communicated, on May 1, 2025, Roquette Frères S.A. (“Roquette”) announced the successful completion of its acquisition of the Pharma Solutions business from International Flavors & Fragrances Inc. (“IFF”). Aligned with this acquisition, IFF granted temporary rights for Roquette’s continued use of the IFF logo and specific brands transferred by IFF to Roquette. We are now preparing to replace all IFF & Danisco logos and three brands transferred by IFF with Roquette logos. Additionally, there will be changes to names and addresses of certain legal entities. The anticipated effective date for the changes on legal entities, along with the logo and trademark changes, is planned for **May 11, 2026**.

Please see Appendix II for the list of examples that will be available to you at this link:  
[www4.pharmasolutions.iff.com/legal-entity-update](http://www4.pharmasolutions.iff.com/legal-entity-update).

#### **What is Changing:**

- The Roquette **logo** will replace the IFF and Danisco trademarks and logos currently in use across all product lines. Please note the refreshed logo on Appendix I.
- There will be changes to names and addresses of certain **Legal Entities** (LE). Customers buying from commercial legal entities in Australia, Canada, China, France, India, Italy, Mexico, Netherlands, New Zealand, Norway (includes manufacturing legal entity), Singapore, UK, and USA will be impacted by these updates. See Appendix I.
- Three **licensed trademarks** owned by IFF: Gelcarin® and Viscarin® (carrageenan), and GRINDSTED® (pectin) will be replaced by SeaGel® (carrageenan) and VERDIGEL™ (pectin) and the manufacturer detail will be clarified on the label. Please see Appendix II for further details.
- **Payment Information:** The bank details linked to those legal entities that will have a change in name and/or address will be updated accordingly. Please note that between now and May 11, 2026 there is no change to the bank accounts you are currently using.
- **Permits, Licenses and Registrations** (PLRs): We have started the work to update the affected PLRs, as allowed by the various regulatory agencies and certification bodies. All the updates will commence in May 2026. To avoid any delays in sales and shipping, we kindly ask that you share any requirements you may have for updates to permits, licenses, and/or registrations necessitated by the upcoming legal entity changes with your account representative or to [pharma.info@roquette.com](mailto:pharma.info@roquette.com) as soon as possible for verification purposes.
- **Documents and Packaging:** These changes will be reflected on commercial invoices, labels, packaging, shipping documents, product descriptions, certificates (including certificates of analysis (COAs)), and safety data sheets, among others. Branding colors used in certain printed packaging (only for METHOCEL™ and ETHOCEL™) will also have a change in color hues. The security seals used at our Newark, Delaware facility for products packaged in drums and big bags will change from a blue seal with white font to a black seal with white font.
- **Labels:** In addition to logo and LE changes, we have updated the format of labels, in particular, for ETHOCEL™, WELLENCE™, CELSENTIAL™, and METHOCEL™ products manufactured in Midland and Stade. Furthermore, the terminology regarding storage conditions on the labels for

Avicel®, AcDiSol®, Alubra®, Endurance®, Lattice®, and carrageenan products have been aligned to its intended conditions. Please see Appendix II for further details.

Until inventory is depleted and final label and document changes are fully implemented, some documents and packaging may state or bear IFF/Danisco or Roquette logos and their respective legal entity names. We confirm that all Roquette and IFF legal entity names and logos are valid and can be accepted as normal.

### What Is Not Changing

- There will be no changes to **taxpayer identification** and **bank account numbers**. As mentioned above, only the bank details (address and/or legal entity names) will be updated accordingly for those legal entities listed on Appendix I
- Specific to this notification and scope of work, there will be no change to raw materials or their suppliers, sourcing strategies, manufacturing sites or their locations, assets, product specifications, or third-party logistics vendors
- No changes to product names except those trademarks mentioned above and no change to product compositions, manufacturing contracts or processes, product quality, quality assurance and regulatory product status as part of these changes. That said, to the extent required, product registrations will be updated to reflect relevant changes
- There is no immediate need to change existing agreements, i.e. sales agreements, quality agreements, etc. When updating agreements in the future, we will update the necessary information.
- Manufacturing locations are not changing as a result of this legal entity change

Our customers continue to be our first priority as we work on these changes. Rest assured, our cross-functional team is completely committed to making this transition as smooth as possible. If you have any questions, please reach out to [pharma.info@roquette.com](mailto:pharma.info@roquette.com) or contact your Roquette representative.

Sincerely,

Angela Strzelecki

## APPENDIX II

### Changes on Labels Requiring Additional Notification

Change	In Scope of Changes	Explanation of Change
<p><b>Storage Condition Terminology</b></p> <p>Before: <i>“Cool and Dry”</i> After: <i>“Indoors at ambient conditions”</i></p>	<p>Ac-Di-Sol® Alubra® Avicel® Endurance® Lattice® SeaGel®</p>	<p>We are updating the storage condition terminology for the products in scope to clarify the original intended conditions. The products have been stored, distributed, and stability evaluated under uncontrolled, ambient conditions. The previous storage conditions stated the product should be stored “cool and dry.” Since those conditions have specific definitions within the pharmaceutical industry different from the intended conditions, the decision was made to change the terminology. The new storage conditions state the material should be stored “indoors at ambient conditions.” There is no change to the product, product storage conditions, or stability program.</p>
<p><b>Label Format</b></p> <p>All products manufactured in Midland and Stade (Pharma, Food, Industrial)</p>	<p>CESENTIAL™ ETHOCEL™ METHOCEL™ WELLENCETM™</p>	<p>The labeling format will change, including some minor additions. Please refer to examples provided.</p>
<p><b>Label Content</b></p> <p>Pectin &amp; Carrageenan</p>	<p>SeaGel® VERDIGEL™</p>	<p>We are updating the legal entity used on label to clearly align with our supply contracts. Please refer to examples provided.</p>
<p><b>Dual Use Statement on Labels</b></p>	<p>Pharma Excipients (excludes APIs, food-grade and industrial products) Ac-Di-Sol® Avicel® METHOCEL™ Non-API Alginates</p>	<p>India’s Dual Use regulation requires the use of specific language on labels of certain imported excipients. We decided to extend these requirements to all destinations by adding the statement “For Excipient Use Only - Not For Medicinal Use” on the labels of all products in scope. New statement will be applied on packaging labels as of May 11, 2026.</p>
